

The new Mulberry Court Condominiums complex has three stories above main grade and features a mixture of one and two bedroom customizable living units. These upscale living units range in size from 940 square feet to 2,120 square feet. The building is served by two separate elevators and stairs that connect all three floors of living units with an underground parking facility. Each individual unit has a private balcony or deck. The building also features a community room with a full kitchen for residents to hold larger family functions. The exterior of the building will feature an attractive combination of HardiePlank siding, stone veneer and stucco finishes. Barrel vault and reverse shed roofs will cover the third floor balconies to create a contemporary look and feel for the building. The main courtyard in front of the building will be fully landscaped featuring a gazebo and a modern water feature.
